#### BTeV Co

#### Cost Notes

- Current cost estimate is over budget by \$200K, after first round of cuts.
  - First round included elimination of redundant chiller and reducing El 766 cooling and power by 30% to reflect the proposed reduction in computers.
  - ➤ Next round of cuts will explore reduction or elimination of paving, hardstand, walks (\$125K burdened) and other creature comforts.
  - After review will need to closely look to see if there are any reduction of power that can be done or change of equipment (example: two 400 amp panels may be cheaper than four 225 amp panels and satisfy the loads.)
  - Using this meeting to test the waters.

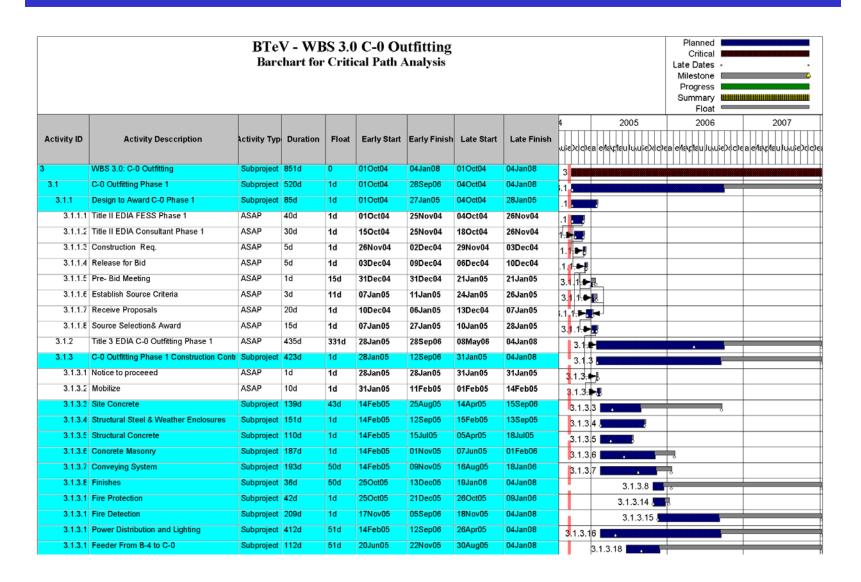

# Schedule Roll-up

#### C-O Occupancy Phase 1

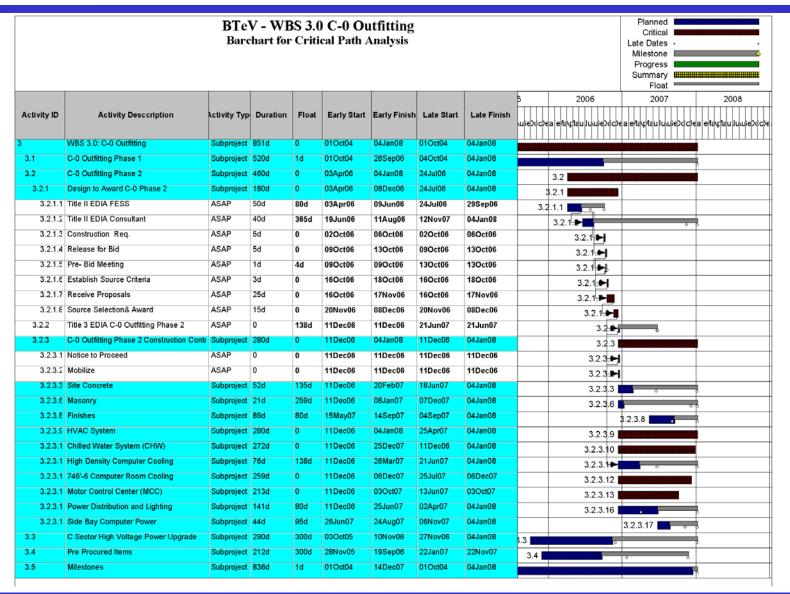

#### Phase 1 Scope Drivers

- Phase 1 to be constructed with FY 05 funds.
  - > Construct what is required to start magnet fabrication.
  - Beneficial Occupancy on Feb. 1, 2005 for Assembly Hall and receiving.
  - > Minimize cost and obligation during FY 05.
  - > Major elements:
    - Counting room floor slabs constructed.
    - Masonry walls constructed and painted.
    - Fire Protection and Fire Detection installed, Assembly and counting rooms.
    - Fire Detection and power installed in Collision Hall
    - 13.8 KV power routed to C-O. Power supply switchboard installed.
    - Elevator and toilet rooms installed.

#### C-O Occupancy Phase 2

### Phase 2 Scope

- Planned to start early FY07, complete Jan. '08.
- Complete counting rooms
  - > Computer floors
  - > Power distribution
  - > Cooling
- Assemble and Collision Hall HVAC systems. Chilled Water system.
- Collision Hall HVAC and fan coils.
- C-0 Service Building work.

### Director's Review Prep Status

- Open Plan schedule and costs loaded.
  - ➤ Need some work fixing schedule logic after adding phases for C-O Outfitting.
  - > Should have Open Plan files frozen by mid day tomorrow.
  - > Open Plan- It has been fun.
- Drawings: Only minor labeling and coordination with scope in Open Plan needed. Will be done Tuesday.
- Advanced CDR and Pep rewrite started.. Should be completed Tuesday.
- Rob Plunkett will be at Fermilab for first day of review only, therefore we will start "our" breakout session next Wednesday and Thursday.
